

With all of our 2018 products, we've continued to innovate and create exciting components and tools. Using new-to-the-category technology, our parts assortment is designed to enhance performance and durability while tools make dialing in the details a breeze. This catalog is full of thoughtful details designed to make your bike look, feel and perform better.

JAGWIRE PERFORMANCE GROUPS Performance Groups / With a product range that includes everything from elite level, race ready products to entry level, basic solutions, we needed a way to make our performance levels easy to understand. Each of our DIY kits, cables and housing is classified in one of four ranges: **ULTIMATE ELITE** The best, race-ready product available. **BEST PRO** High-performance upgrades to standard housing and cables. **BETTER SPORT** OEM level replacement products that combine durability and performance. **GOOD BASICS** No-nonsense, low cost, reliable replacement parts.

Compatibility

Designed specifically for road bicycles. From road-specific cable heads to brake pads for carbon rims. these components fly down the road.

Designed specifically for mountain bicycles. From MTB disc brake pads to hydraulic hose these parts smooth out

Thoughtfully crafted to work on just about any bicycle. This versatile gear slots right into place.

Component Compatibility

Contains everything required for a complete service of a road brake and shift system.

Contains everything required for a complete service of shift system.

Compatible with hydraulic braking

Compatible with all braking systems. cable-actuated.

Compatible with cable-actuated braking systems on mountain bicycles.

Compatible with cable-actuated braking systems on mountain and road bicycles.

Compatible with cable-actuated braking systems on road bicycles.

Brake Pad Type

Rim-brake compound designed for carbon fiber braking surfaces.

Brake compound designed for use in any weather condition.

Pad compound designed for exceptional stopping power in dry conditions. For use with alloy brake surfaces.

Pad compound designed for superior wet weather performance.

Tech

Slick-Lube is a method of manufacturing with consistently distributed lubrication

Speed-Lube ultra-slick lubricant reduces friction and enhances lever feel.

Additional housing is included in extra-long kits.

Jagwire hydraulic hoses incorporate Quick-Fit adapters to offer compatibility with most popular brake systems.

Extra length and anti-kink end caps are all part of folding bike cable kits.

Manufactured with weight-reducing materials or construction techniques.

Ultra-slick cables have extra surface treatment to dramatically reduce friction.

Cable Ends

SRAM® and Shimano® shift cable head on one end, welded tip on the other.

Campagnolo® shift cable head on one end, welded tip on the other.

SRAM®/Shimano® shift cable head on one end Campagnolo® shift cable head on the other.

SRAM®/Shimano® road cable kit Includes both brake and shift cables

SRAM® and Shimano® road brake cable head on one end, welded tip on the other.

Campagnolo® road brake cable head on one end, welded tip on the other.

SRAM®/Shimano® road brake cable head on one end SRAM®/ Shimano® MTB brake cable head on the other.

SRAM® and Shimano® MTB brake cable head on one end, welded tip on the other.

Road Elite Link Shift

- Durable, aluminum housing won't kink or rust
- Compressionless housing and ultra-slick polished cables deliver precise shifting performance
- 20% lighter than traditional linear strand shift housings
- Bikes with continuous housing, disc brakes, and/or extra-large frames may need additional links and/or liners. Service parts for Road Elite Link Shift Kits can be found on page 54

2 LEX-SL 4mm Shift Housing, 300mm 2 Open End Caps 2 Cable Tips 2 Pro Indexed Inline Adjusters 2 Rotating Hooks 2 Housing Connectors (4/4mm) 4 Adapter End Caps to 4mm Shift Housing

Road Elite Link Brake

- Durable, aluminum housing won't kink or rust
- Compressionless housing and ultra-slick polished cables result in crisp brake lever feel
- 50% lighter than traditional coiled steel brake housings; 30% lighter than Kevlar® brake housings
- Bikes with continuous housing, disc brakes, and/or extra-large frames may need additional links and/or liners. Service parts for Road Elite Link Brake Kits can be found on page 54

1 Dirt Guard

ROAD-BRAKE

18*)*

Elite Link /

This aluminum link housing is the ultimate combination of durability and attention grabbing looks. Available in Black, Red, Silver, Gold, or Blue—it's designed to enhance your performance and appearance.

So, why is it better than traditional housing? It's compression-less, which means precise shifting and better braking performance with enhanced modulation. But its flexibility allows for tight bends without kinking. It's also much lighter than traditional coiled steel or linear strand housing while being more durable. Combine these benefits with our Elite, ultra-slick polished cables and Slick-Lube liners that dramatically reduce friction and you've got the best of performance and style.

What's Important

- Compressionless shifting and braking performance combined with extreme flexibility
- Each kit comes with links pre-installed on housing segments making setup quick and simple
- Weight saving versus traditional linear strand or coiled steel housing = 20% shift and 50% brake
- Durable, ultra-slick polished inner cables minimize system friction

Mountain Elite Link Shift

- Durable, aluminum housing won't kink or rust
- Compressionless housing and ultra-slick polished cables deliver precise shifting performance
- 20% lighter than traditional linear strand shift housings
- Bikes with continuous housing, disc brakes, and/or extra-large frames may need additional links and/or liners. Service parts for Mountain Elite Link Shift Kits can be found on page 54

The Elite Sealed Kit uses a continuous liner that seals the system completely, protecting it against dirt, mud and debris. Available in unique frozen (matte) colors, this system offers the ultimate combination of protection and low-friction performance.

To ensure the lowest possible friction, we developed a unique polymer-coated cable and paired it with Speed-Lube ultra-slick lubricant used throughout the liner. This combination delivers amazing performance and the precise lever feel you expect.

What's Important

- The continuous liner running from the levers to the brake caliper or derailleur offers much more protection from dirt and debris
- Ultra-slick polymer-coated cables are paired with our Speed-Lube to reduce friction
- Lightweight XEX shift housing is nearly 30% lighter than traditional shift housing

Road Elite Sealed Shift

- Polymer-coated cables dramatically reduce friction
- Speed-Lube ultra-slick lubricant enhances performance
- Lightweight XEX housing is nearly 30% lighter than traditional shift housing
- Service parts for Road Elite Sealed Shift Kits can be found on page 54

Road Elite Sealed Brake

- Polymer-coated cables dramatically reduce friction
- Speed-Lube ultra-slick lubricant enhances performance
- Low-compression housing results in crisp brake lever feel
- Service parts for Road Elite Sealed Brake Kits can be found on page 54

Frozen Gray

The Elite Sealed Kit uses a continuous liner that seals the system completely protecting it against dirt, mud and debris. Available in unique frozen (matte) colors, this system offers the ultimate combination of protection and low-friction performance.

To ensure the lowest possible friction, we developed a unique polymer-coated cable and paired it with the new Speed-Lube ultra-slick lubricant used throughout the liner. This combination delivers amazing performance and the precise lever feel you expect.

What's Important

- · The continuous liner running from the levers to the brake caliper or derailleur offers much more protection from dirt and debris
- Ultra-slick polymer-coated cables are paired with our Speed-Lube to reduce friction
- Lightweight XEX shift housing is nearly 30% lighter than traditional shift housing
- · Because most high-performance mountain bikes use hydraulic or mechanical disc brakes with full housing, the Mountain EliteSealed kits are currently only available for shift systems

Mountain Elite Sealed Shift

- Polymer-coated cables dramatically reduce friction
- Speed-Lube ultra-slick lubricant enhances performance
- Lightweight XEX housing is nearly 30% lighter than traditional shift housing
- Service parts for Mountain Elite Sealed Shift Kits can be found on page 54

HYDRAULIC HOSE

Pro Hydraulic Hose

With more disc brake platforms on the market than ever before, fitting hydraulic hoses can be complex and frustrating. That's why we developed the Quick-Fit™ Hydraulic Hose adapter system, a foolproof approach utilizing proven caliper-adapter technology from the motorcycle world.

Pro universal hoses makes it safe and easy to dial in a perfect fit. Simply select a Pro Hose and match it with a compatible Pro Quick-Fit™ Adapter kit. It's that easy. Pro Hydraulic Hoses come in 12 colors and finishes. Pro Quick-Fit™ Adapter kits for these brake manufacturers are available separately in convenient packaging: SRAM®, Avid®, Shimano®, Magura®, Formula®, Tektro®, Hayes® and Hope®.

Hose Construction: Kevlar® Reinforced

Brake Rotors

Jagwire's new LR1 Pro Lightweight Rotors are a stylish way to upgrade the performance on your bike. Utilizing a 2-piece construction, they feature a separate aluminum spider and stainless steel brake track. The steel braking surface delivers quiet, consistent performance while the spider helps reduce rotating weight by roughly 15% compared to a traditional single-piece rotor.

What's Important

- The high-quality, stainless steel machined braking surface ensures consistent stopping power and superior modulation
- Lightweight aluminum spider keeps weight to a minimum
- The spider design ensures compatibility with 6-bolt designs

DISC BRAKE ROTORS

Elite Vented Disc Brake Rotors

- · High-quality, stainless steel braking surface
- Lightweight, aluminum cooling fins pull heat away from the braking surface
- · Compatible with 6-bolt systems

Part Number		Description	Hub/Brake Compatibility	Rotor Size	Weight
DCR000	E CONTRACTOR OF THE PARTY OF TH	Elite CR1 Vented Disc Brake Rotor	6-Bolt Disc	180mm	142g
DCR001		Elite CR1 Vented Disc Brake Rotor	6-Bolt Disc	160mm	140g

3-Piece Rotor Construction

Stainless Steel Braking Surface

This high-quality stainless steel surface ensures powerful and consistent braking performance. Connected to the spider with six oversized rivets, the design resists warping and delivers quiet, durable, hard stopping performance.

Aluminum Cooling Fins

Six lightweight cooling fins pull heat away from the braking surface and dissipate it before the loss of braking performance caused by heat build-up i n the pad or caliper.

6-Bolt Aluminum Spider

This sturdy, 6-bolt spider design adds structural strength while keeping weight to a minimum.

Vented Heat Management

Each of the six aluminum inserts is designed to pull heat away from the braking contact point. Air is then pulled through the vents dissipating the heat and reducing the risk of boiling the brake fluid or glazing the pad surface.

This heat management system sheds heat much faster than a standard steel rotor which results in more consistent, reliable braking performance even during extreme riding.

Pro Lightweight Disc Brake Rotors

- · High-quality, stainless steel braking surface
- Aluminum spider reduces weight
- Compatible with 6-bolt systems

Part Number	Description	Hub/Brake Compatibility	Rotor Size	Weight
new DCR020	Pro LR1 Lightweight Disc Brake Rotor	6-Bolt Disc	180mm	130g
new DCR021	Pro LR1 Lightweight Disc Brake Rotor	6-Bolt Disc	160mm	105g
new DCR022	Pro LR1 Lightweight Disc Brake Rotor	6-Bolt Disc	140mm	85g

NOTICE: CR1 and LR1 rotors are NOT compatible with brakes when the pad extends below the caliper body. Examples include the Avid BB7, Avid Juicy, Hayes HFX and Hayes MX1.

Disc Brake Pads

• Use the Fit Finder at jagwire.com for the most up-to-date list of compatible models

Sport Semi-Metallic

Jagwire Sport Semi-Metallic disc brake pads are a great improvement from OEM. They feature a high-performance semi-metallic compound that blends the low-noise of a resin pad with the durability of a metallic pad. Mounted to a steel backing plate, these are great all-purpose pads.

Sport Organic

Jagwire Sport Organic pads feature an all-new resin compound. Mounted on a steel backing plate, this compound gives good power and modulation, while keeping noise to a minimum. Great for riders primarily riding in dry conditions.

Pro Semi-Metallic

Pro Semi-Metallic pads feature a lightweight aluminum backing plate attached to the same quiet and high-performance compound found on our Sport Semi-Metallic series disc pads. Weight is reduced by nearly 50%. These pads are perfect for cross-country applications.

Pro Extreme Sintered

Pro Extreme Sintered pads feature an aggressive compound that provides maximum stopping power making it perfect for DH riding. The dense, sintered compound also resists water making it extremely effective in wet conditions.

END CAP GUIDE

End caps may seem like a small detail, but they can have a big impact on how well a bike performs. Jagwire offers a wide range of end caps for riders needing the lowest possible friction, protection against the elements, or unique solutions for their bike.

HOODED

Hooded end caps are the ultimate solution for preventing water, dirt and debris from entering the housing. A high-quality rubber seal provides an extra layer of protection keeping contaminants out and maintaining optimal cable performance. These are best used in the dirtiest spots on the bike, like the rear derailleur.

WHEN TO USE: Install hooded end caps on areas of the bike that need the most protection from dirt and debris such as the rear derailleur.

SEALED

Sealed end caps are an excellent choice for shift systems when you're looking to balance low friction performance with protection against contaminants. A lower friction option than a hooded end cap, sealed end caps have an internal rubber o-ring to help keep the housing clean and dry.

WHEN TO USE: Install sealed end caps when you want protection from dirt and debris, but also want to keep friction to a minimum in areas like frame stops.

LINED

Lined end caps have an internal sleeve that extends out from the end. This liner protects the inner cable from the opening in the end cap, preventing cable coatings from wearing off and ensuring the lowest possible friction. Lined end caps can also be paired with a sealing liner or a dirt guard to keep dirt and grime out of the housing.

WHEN TO USE: Use lined end caps whenever you use Teflon®-coated cables to protect the coating.

OPEN

Open end caps deliver low friction performance and are less expensive, but do little to protect the system from contaminates. Great for use on bikes with uncoated cables in areas with a lower chance of contamination from water or dirt, they are available in multiple sizes, materials and colors.

WHEN TO USE: Use open end caps when little protection from dirt is needed in areas such as levers.

POP

POP (Point Of Power) end caps are designed specifically for use with 5mm compressionless brake housing. This type of housing requires an end cap, but not all frames and brake calipers are built to accept a standard-size end cap. POP end caps act as a reducer, allowing compressionless housing to be used in these situations.

WHEN TO USE: If you're upgrading to compressionless housing POP end caps are needed with some brakes that aren't built for end caps.

ANTI-KINK

Jagwire anti-kink end caps are made with a flexible tip to eliminate kinks or cracks in the housing where there are tight bends or repeated motion. These are perfect for use with folding bikes, suspension lockouts, dropper seatposts and handcycles.

WHEN TO USE: Use anti-kink end caps on any area of the bike where shift or brake housing has extreme or tight bends.

End Cap Combo Kit

- Contains 16x 5mm open end caps, 16x 4mm open end caps, and 16x cable tips in each of three colors
- Refill packs available separately for each color

- 16 of 4.0mm open
- 16 of 5.0mm open
- 16 cable tips

Description

- · Combo kit refill packs
- Alloy

Universal Pro Housing Seal Kits

- · Seal kits are designed to provide your cables with an extra layer of protection against the elements
- Seal liner fits over specially designed housing end caps

• 6 lined end caps

• 1 sealed end cap

• 2 open end caps

• 1 hooded end cap

• 2100mm seal liner

• 2 cable tips

4.0mm for Solid Color Shift Housing

Description

4.5mm for Braided Shift Housing

- 6 lined end caps
- 1 sealed end cap
- 2 open end caps
- 1 hooded end cap
- 2 cable tips
- 2100mm seal liner

5.0mm for Brake Housing

Description

- 2 cable tips

 - 650mm seal liner

• 4 lined end caps

• 4 open end caps

• 2 POP end caps

Universal Pro End Cap Packs

For Solid Color Housing

For Braided Housing

Part No. Description • 4 cable tips

• 10 of 4.5mm sealed

- 6 of 5mm open
- Enough end caps for one bicycle

Pro Internal Routing Tool

Jagwire's Pro Internal Routing Tool simplifies routing through a frame, using powerful magnets to safely and easily guide inner cables, housing, hydraulic hose, and e-shift wires.

Part No.	Description	Color	Material	Qty
WST050	Pro Internal Routing Tool	Black	Reinforced Plastic	1
WST049	Pro Internal Routing Tool Replacement Fittings	Silver/Black	Steel	One Set

Pro Internal Routing Tool Construction

Innovative Design

The main body is made using a high quality, lightweight, and durable reinforced plastic. Its compact shape makes it simple to use, and the self-contained design makes storage easy when not in use.

Flexible Secondary Magnet

The secondary magnet can be inserted directly into the frame to attract magnetic items. Stored within the tool when not in use, its flexible design allows it to reach inside and retrieve objects from hard to access places.

High Strength Primary Magnet

This powerful magnet is used to guide magnetic items through the frame. By holding the primary magnet against the outside of the frame wall, its magnetic field will draw the object toward it.

Includes Adapter Fittings

Cleverly stored within the tool, fittings are included to provide routing solutions for inner cables, housing, hydraulic hose, and e-Tube electronic shift wires. A flexible lead wire with magnetic end is included to simplify even the most difficult routing challenges.

TOOLS

Cutters and Crimpers

Jagwire's Pro Cable Crimper and Cutter makes it easy to trim a cable and then perfectly crimp a cable tip every time.

The Pro Housing Cutter's adjustable-size grip is comfortable for all hand sizes and an integrated awl helps clear the way for smooth cable operation.

Part No.	Description	Color	Material	Qty
WST036	Pro Cable Crimper and Cutter	Yellow	SK5 Steel & Plastic	1
WST028	Pro Housing Cutter	Yellow	SK5 Steel & Plastic	1

Brake Pad Tools

Replacing brake pad inserts can be a challenge. The Pad Press Plus® makes removing and installing brake pad inserts simple and easy. The new design is compatible with both mountain and road pad types and supports SRAM®, Shimano® and Campagnolo® pad designs. The included screws make for easy mounting to any workbench. The Brake Pad Tuner makes setting pad toe-in a breeze.

Part No.	Compatible Systems	Color	Material	Qty
WST029	Brake Pad Tuner®	Yellow	PP	One Pair
WST024	Pad Press Plus® Shimano®, SRAM® & Campagnolo® Mountain & Road Pad Compatible	Black/Yellow	Die-Cast Steel	1
WST037	Pad Press Plus® Replacement Tip	Yellow	Plastic	1

Disc Brake Multi-Tool®

The Disc Brake Multi-Tool® is four frequently used disc brake tools in one: pad spacer, bleed block, rotor truer and piston press.

Part No.	Compatible Systems	Color	Material	Qty
WST032	Disc Brake Multi-Tool®	Black/Yellow	Steel & Plastic	One Set
WST044	Disc Brake Pad Spacer & Bleed Block	Yellow	Plastic	One Set

Needle Driver[™]

Installing hydraulic hose fittings shouldn't be done using a hammer. The delicate brass fittings in the end of a hydraulic hose can be easily crimped or not installed flush with the end of the hose. This results in potentially poor brake performance. The Needle Driver™ is a simple-to-use tool that secures the end of a hydraulic hose and allows for easy and gentle installation of standard needles as well as both T8 and T10 Torx fittings.

	Part No.	Description	Color	Material	Qty
grade	WST026	Needle Insertion Tool	Black/Yellow	Plastic	1

Hydraulic Hose Fittings Combo Box

HFA900: Includes a variety of common fittings and seals for a range of disc brakes from Avid®, Formula®, Magura®, Shimano®, Hayes® and Tektro®

Hydraulic Hose Fittings Mini Combo Box

HFA800: Includes the most common lever-side fittings from for SRAM®, Avid®, and Shimano® disc brakes.

CABLE GUIDE

Jagwire knows wire—that's why it's in our name. Friction in a shift or brake setup results in poor, sloppy performance, ruining the feel of any bike or system. That's why our wire is manufactured to the highest standards in the industry. Lubricated and pre-stretched, hundreds are pulled from production, checked and tested each week to ensure durable operation for many rugged miles.

ULTIMATE ELITE

BEST PRO

Elite Polished Ultra-Slick or Polymer-Coated Stainless Steel

These Elite cables deliver incredibly accurate, smooth performance for riders that demand the ultimate performance from their bikes. Jagwire offers two options:

- 1) An uncoated cable that is highly polished to a near-mirror finish that can be used with any performance housing and lubricant
- 2) An ultra-slick polymer-coated cable for use in our Elite Sealed Systems with continuous housing/liners These Elite cables deliver incredibly accurate, smooth performance for riders that demand the ultimate performance from their bikes
- STS-EL (polished) pre-stretched, highly polished, uncoated slick stainless steel spiral-bound cables
- STS-LF (polymer-coated) pre-stretched, slick stainless steel spiral-bound cables with an ultra-slick polymer coating designed for use in Jagwire Sealed Kits

Pro Polished Slick Stainless

Slick stainless cables undergo a polishing process to further remove imperfections. This creates a smoother surface with lower friction than PTFE-coated cables. With no coating, these are highly durable and compatible with all performance housings and lubricants. Typically used on high-end bikes, by riders wanting improved performance.

STS-PS-pre-stretched, polished, slick stainless steel spiral-bound cables

BETTER SPORT

Slick Galvanized or Stainless Steel

An upgrade from basic cables, these galvanized or stainless steel strands are pre-stretched, then extruded through a die that removes the rough edges resulting in a smooth surface that reduces friction along the length of the cable. These cables are the most popular choice for riders balancing performance, durability and cost. The stainless steel option offers greater resistance to corrosion. Jagwire slick cables come in two types:

- GAS pre-stretched, slick galvanized steel spiral-bound cables
- STS pre-stretched, slick stainless steel spiral-bound cables

GOOD BASICS

Galvanized or Stainless Steel

Low-cost, no-nonsense shift and brake cables made from spiral-bound galvanized or stainless steel strands. While both are great for entry-level, low-cost bike repairs, the stainless steel offers greater resistance

GAR - galvanized steel spiral-bound cables

to corrosion. Jagwire basic cables come in two types:

STR - stainless steel spiral-bound cables

Elite Shift Inner Wire — Ultra-Slick Polished

- Ultra-slick surface delivers precise, low friction performance critical to 11-speed drivetrains
- There is no coating to flake off during installation or riding, making the cable more durable and ensuring long lasting performance
- STS-EL cables are compatible with all performance housing, lubricant and end cap combinations
- Cable ends are colored black for easy identification

Workshop Filebox

Manufacturing Process:

The cables are then pre-stretched and pulled through a die that removes the rough edges creating a smooth, slick surface

The last stage is an additional, proprietary cleaning and nano polishing process that delivers an ultra-slick surface.

Friction in a brake system results in poor lever feel and slow, sticky performance. Jagwire maintains specific standards for friction and tests hundreds of inner wires every week to ensure these high standards are met and maintained. Lubricated and pre-stretched during the manufacturing process; Jagwire inner wires will ensure worry-free performance.

HOUSING GUIDE

ULTIMATE ELITE

SHIFT AND BRAKE HOUSINGS

Sealed, Lubricated

Jagwire sealed systems, available only in DIY kits, include liners that run continuously from the lever to the brake or derailleur. This protects the cable and housing from dirt, mud or anything else that can cause friction. But because the liner runs the full length of the cable, a specially developed cable coating and lube are used to keep friction to a minimum. Housing for this system comes in two types:

XEX - lightweight, braided steel strands around a Speed-Lube Liner

CSX - high carbon, low compression coiled steel around a Speed-Lube Liner.

SHIFT AND BRAKE HOUSINGS

Aluminum, Lightweight, Lubricated

An alternative to traditional compressionless housing, this system is made of nesting alloy pieces that protect the liner. Although this housing is typically more expensive, it has several advantages including increased flexibility, reduced weight and increased durability. Both shift and brake housings use identical Slick-Lube liners and interconnecting alloy pieces.

ALLOY - interconnecting alloy links around a Slick-Lube Liners

BEST PRO

SHIFT HOUSING

Lightweight Linear Strand, Lubricated

A combination of steel and polymer strands are wrapped around the Slick-Lube Liner and create a compressionless ring. This provides the accurate cable movement needed for modern drivetrains, with a weight savings of 30% compared to traditional linear strand shift housing.

XEX-SL - lightweight, braided steel strands around a Slick-Lube Liner

BRAKE HOUSINGS

Linear Strand, Kevlar® Reinforced, Lubricated

A performance upgrade to coiled steel, this compressionless housing starts with a similar construction to LEX shift housing that reduces weight by 30%.

KEB-SL - linear steel strands around a Slick-Lube liner wrapped in a Kevlar[®] weave

HOUSING GUIDE

BETTER SPORT

SHIFT HOUSING

Linear Strand, Lubricated

Linear strands of steel are used to encircle the Slick-Lube Liner creating a compressionless ring. This delivers responsive, precise, crisp performance necessary in shift applications.

LEX-SL - linear steel strands around a Slick-Lube Liner

BRAKE HOUSING

Coiled Steel, Lubricated

No-nonsense, OE-quality brake housing using high carbon coiled steel wrapped around an inner liner. This coiled steel structure will allow some compression, but the high-quality, high carbon steel used limits the amount.

CGX-SL - high carbon, low compression coiled steel with a Slick-Lube Liner

GOOD BASICS

SHIFT HOUSING

Linear Strand, Non-Lubed

Quality, low-cost shift housing using linear steel strands wrapped around an inner non-lubed liner. The combination of low cost and long-lasting performance makes it ideal for entry-level bike service.

LEX - linear steel strands around a non-lubed liner.

BRAKE HOUSING

Coiled Steel, Non-Lubed

Quality, low-cost brake housing using coiled steel wrapped around an inner non-lubed liner. The combination of low cost and long-lasting performance makes it ideal for entry-level bike service.

CEX - coiled steel housing with non-lubed liner

WARNING

XEX-SL, XEX, LEX-SL and LEX shift housings must never be used for brake applications Only CSX, KEB-SL, CGX-SL, CEX, and alloy link housings are designed to handle the more extreme pressures of braking.

Jagwire Slick-Lube lined shift housings are the first choice for the world's best brands. Giant, Specialized, Felt, Cannondale, GT, Merida, Norco and hundreds of others trust Jagwire to deliver high-quality, durable performance. Manufactured with lead-free PVC, Jagwire housings meet all international standards and regulations for chemical and material content.

NOTES

Exploring New Horizons for Control Systems

For more than 20 years, Jagwire has pioneered new territory in the manufacture of high performance control systems. As an ISO 9001/TS-16949 company we have an unyielding commitment to quality.

Faster, Leaner, Better

Fully committed to process improvement, our experienced engineering staff is always looking for ways to enhance quality, reduce errors and increase customer satisfaction. Partnering with Toyota, we integrated the highly efficient Toyota Production System (TPS). Our balanced blend of automation and manual processes helps us manage flow and volume, resulting in unsurpassed quality and efficiency. And as a member of the Taiwan A-Team manufacturing group, we develop improved business strategies and tactics to reduce lead times, improve quality and cut defects and waste.

Environment & Community

Recognizing our vital role as responsible global citizens, we strive to produce products that meet the exacting requirements of government agencies for performance, safety and environmental impact. Our primary control system products are CPSIA, Proposition 65 and CEN certified.

Chia Cherne Industry Company, Ltd Warranty Policy

EXTENT OF LIMITED WARRANTY

Chia Cherne/Jagwire warrants its products to be free from defects in materials or workmanship for a period of two years after original purchase. This warranty only applies to the original owner and is not transferable. Claims under this warranty must be made through the retailer where the bicycle or the Jagwire product was purchased. Original proof of purchase is required. Complete product warranty information is available by visiting <code>jagwire.com</code>. Or a copy may be requested via email. Email: <code>info@jagwire.com</code>

Product Safety & Installation

WARNING: Many bicycle service and repair tasks require special knowledge and tools. In order to help minimize the chances of an accident and possible injury, it is critical that you have any installation, repair or maintenance performed by a professional bicycle mechanic or dealer. Do not begin any adjustments or service on your bicycle yourself until you have learned from your mechanic or dealer how to properly complete them. Improper adjustment or service may result in damage to the bicycle or an accident, which can cause serious injury or death.

Consult your dealer or mechanic for help in determining your maintenance requirements. Like any mechanical device, a bicycle and its components are subject to wear and stress. Different materials and mechanisms wear or fatigue from stress at different rates and have different life cycles. If a component's life cycle is exceeded, the component can fail, causing serious injury or death to the rider. Scratches, cracks, fraying of wires and discoloration are signs of stress-caused fatigue and indicate that a part is at the end of its useful life and needs to be replaced. While the materials and workmanship of bicycle components may be covered by a warranty for a specified period of time by the manufacturer, this is no guarantee that the product will last the term of the warranty. Product life is often related to riding style and product care. A component warranty is not meant to suggest that the component cannot be broken or will last forever.

Before installing any component or accessory make sure that it is compatible with your bicycle by checking with your dealer.

WARNING

- 1. Riding with improperly adjusted brakes, worn brake pads, worn control cables or housings is dangerous and can result in serious injury or death.
- Applying brakes too hard or too suddenly can lock up a wheel, which could cause you to lose control and fall. Sudden or excessive application of the front brake may pitch the rider over the handlebars, which may result in serious injury or death.
- Some bicycle brakes, such as disc brakes and linear-pull brakes are extremely powerful. Take extra care in becoming familiar with these brakes and exercise particular care when using them.
- 4. Disc brakes can get extremely hot with extended use. Be careful not to touch a disc brake until it has had plenty of time to cool.
- See the brake manufacturer's instructions for operation and care of your brakes. If you do not have the manufacturer's instructions, see your dealer or contact the brake manufacturer.

WARNING: Jagwire cables, housings and brake pads are not intended for use on any motorized bicycle or vehicle. Any such use could result in a serious personal injury.

Brake Inspection

Inspecting your bicycle's braking systems before each ride is critical to your safety. Check the brakes for proper operation.

- Squeeze the brake levers
- · Are the brake quick-releases closed?
- All control cables seated and securely engaged?
- Do the brake pads contact the wheel rim squarely and make full contact with the rim?
- Are the bolts that attach your brake pads to the brake caliper tight?
- Do the brake pads touch the wheel rim within an inch of brake lever movement?
- Can you apply full braking force at the levers without having them touch the handlebar?

If not, your brakes need adjustment. Do not ride the bike until the brakes are properly adjusted by a professional bicycle mechanic.

The effectiveness of braking is dependent on environmental factors and equipment condition over which Jagwire has no control. Consult the owner's manual for your bicycle and a professional bike mechanic or dealer to learn more about proper braking techniques and always practice riding and braking techniques on a flat and level surface prior to riding.

Under wet conditions, the stopping power of your brakes is dramatically reduced. In wet conditions, ride slowly and apply your brakes earlier than you would under normal, dry conditions.

Inspect your brakes, cables and brake pads regularly for damage and always inspect them thoroughly after any crash or severe impact. If you detect damage, please have your bicycle inspected by a professional bike mechanic or dealer.

Important: If the brake pads are worn until the grooves disappear, replace them with new pads. If wheel rims are excessively worn from braking, replace them with new rims.

Cables

Improper set-up or use of brake control cables can result in loss of control or lead to a serious accident, which could lead to a severe injury.

It is your responsibility to ensure that your brake control system cables are functioning properly before each ride. Consult the owner's manual for your bicycle and a professional bike mechanic or dealer to learn more about proper cable installation and maintenance techniques.

Inspect your cables and housings regularly for damage or wire fraying, and always inspect them thoroughly after any crash or severe impact. If you detect damage, please have your bicycle inspected by a professional bike mechanic or dealer.

Important: If your control system wires begin to fray, your housing end caps show any signs of damage or your housing is kinked, replace them with new products.
